Informatics student at Universitas Multimedia Nusantara with a strong interest in Mobile Application Development, Software Development, and UI/UX Design. Experienced in developing application projects, designing user-centered interfaces, and collaborating in multidisciplinary teams. Detail-oriented, creative, and responsible, with strong problem-solving and teamwork skills. Eager to continuously learn new technologies and develop innovative, user-focused digital solutions.

Education Level

Universitas Multimedia Nusantara - Tangerang, Indonesia — Aug 2024 - Aug 2028 (Expected)

Bachelor of Informatics, 3.94/4.00

- Awarded a tuition scholarship to support undergraduate studies at Universitas Multimedia Nusantara.
- Ranked among the top 10% of Informatics students based on academic performance.
- Applied programming, software engineering, and problem-solving principles through academic projects involving application development, database management, and user interface design.

Organisational Experience

Kompas Corner UMN - Tangerang. Indonesia — Feb 2025 - Feb 2026

General Affairs

Kompas Corner UMN is a campus facility at Universitas Multimedia Nusantara that provides access to information and learning resources while supporting academic activities in an organized and collaborative environment.

- Supported daily facility operations for 45+ weeks, maintaining a comfortable and organized environment for students, staff, and campus activities.
- Collaborated with a 5-member team to coordinate facility maintenance, administrative responsibilities, and daily operational requirements.
- Coordinated 15+ operational tasks and prepared rooms and equipment for 10+ activities, including meetings and podcast filming, ensuring facilities were ready for scheduled use.
- Monitored and maintained 100% of assigned facilities, helping ensure equipment usability and facility readiness.
- Helped resolve 8+ room reservation and equipment borrowing issues by coordinating operational follow-ups, minimizing potential disruptions to scheduled activities.

OMB UMN 2025 - Tangerang, Indonesia — Feb 2025 - Aug 2025

Consumption Division Staff

Orientasi Mahasiswa Baru UMN (OMB UMN) is an annual orientation program that introduces new students to Universitas Multimedia Nusantara's values, culture, and campus environment while fostering student adaptation and collaboration.

- Coordinated meal preparation and distribution for 200+ committee members throughout 28+ weeks of preparation and operations, supporting the timely fulfillment of consumption needs.
- Replenished drinking water across the event area for 1,500+ new students, helping maintain water availability during orientation activities.
- Collaborated with a 20-member team to coordinate food and beverage logistics across 4 event days, supporting the consumption needs of committee members and participants.
- Coordinated consumption preparation and distribution according to event schedules, supporting 100% on-time delivery for assigned sessions.

Skills, Achievements & Other Experience

- **Competition** (2026): Participated in the ISFEST UI/UX International Competition 2026.
- **Hard Skills** (2026): Successfully completed the HCIA-AI V4.0 course, gaining foundational knowledge of artificial intelligence, machine learning, neural networks, and deep learning, including their applications in intelligent systems.
- **Hard Skills** (2025): Successfully completed the HCIA-openGauss V1.0 course, gaining foundational knowledge of database management, SQL operations, relational database concepts, and openGauss database technologies.
- **Projects** (2026): Designed CampusShare, a collaborative learning platform with AI-assisted learning features, focusing on intuitive user interfaces, user-centered design, and student collaboration. Developed concepts for learning material sharing, academic discussions, progress tracking, and personalized learning recommendations.
- **Projects** (2025): Developed ROMI Salon, a web-based salon booking and management system designed to streamline appointment scheduling and salon operations. Focused on implementing functional web interfaces and organizing booking-related information to improve usability and operational efficiency.
- **Projects** (2025): Developed Ucup Menjelajah Nusantara, an educational adventure web game using React and JavaScript. Implemented interactive gameplay mechanics, character movement, inventory management, player statistics, and multiple explorable areas to create

an engaging gaming experience.
